WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

- Shaft 25, 686 long; 4 mm cross hole at the hub
- 12-tooth sprocket welded to a 36 mm hub that turns freely on the shaft
- Drill hub and shaft together for the 4 mm shear pin
- Crank arms 250 between centres, 180 degrees apart, pinned to the shaft
- Handles 32 x 120 turn on M12 bolts
- Check: hub turns freely with the pin out, locks with it in
