WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

- Inside 446 wide, 600 long to the lip, sides 200 high
- Floor 520 long; back slopes 80 so it rides over mud going back
- Lip 8 x 50 bar set at 20 degrees, bevelled to the floor
- Two skids 8 x 25 under the floor, 340 apart, rear ends cut at 45 deg
- Four bridle lugs 10 mm, 19 mm holes 75 up: two at the front, two at the rear
- Tipping bar socket 33.7 x 150 at 45 deg on the back; bar 26.9 x 900 loose
- Check: 40 L of water to a 165 mm level fits; sits flat on its skids
