RIGHT VIEW

Scale 1:10; looking at the right side (along -X)

WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Make two the same. Inside 210 wide, 845 long to the lip, sides 280 high
Floor 735 long; back slopes 110 so it rides over mud going back
Lip 8 x 50 bar set at 20 degrees, bevelled to the floor
Two skids 8 x 25 under the floor, 160 apart, rear ends cut at 45 deg
Four bridle lugs 10 mm, 19 mm holes 75 up: two at the front, two at the rear
Tipping bar socket 33.7 x 150 at 45 deg on the back; one bar 26.9 x 900 loose
258 over the shackle pins, so two boxes pass 42 apart on lines 300 apart
Check: 40 L of water to a 245 mm level fits; sits flat on its skids
